

RUBIN NJAGI

BSC BBIT, CCNA, ACCA, AWS EXPERT.

ABOUT

Project-manager and developer at solutions science ltd An IT and security systems installation company.

WORK EXPERIENCE & DUTIES

Co-Founder | Solution Science ltd | 2013 – Current

Over the years I have acquired relevant administration experience in Information Technologies. Initially, as co-founder of IT & security systems installation company, I got the opportunity to plan, manage and supervise complex long-term (over 6 months) security installation contracts leading a team of about 6 engineers and numerous casual laborers.

Later, I have managed a remote team of developers building applications in the cutting-edge space of blockchain technology.

My ACCA qualifications have come in handy in ensuring I have the relevant skills in budgeting, cost management, performance review & management and deep accounting skills.

Dev-Team-Lead | fantasy coin | Give Foundation

I have managed a remote team of developers building applications in the cutting-edge space of blockchain technology.

Sales Representative | Eco-bank | 2011 – 2012

Present, promote and sell Banking products/ services using solid arguments to existing and prospective customers
